Multicooker-pressure cooker Oursson MP5015PSD is an excellent assistant in the kitchen, as it can fry, steam, boil, braise, bake, and can replace a lot of old kitchen appliances. It is incredibly comfortable – no more washing dishes after cooking a complicated dish! Now you can cook using only one pan, adding all the ingredients to it.

Your new assistant has 45 automatic programs, 13 levels of protection and an anti-steam coating DYKING (Japan), which is durable and easy to clean. There are also accessories for cooking and a recipe book included in the kit.
