

Specifications	
Cold press	Yes
Self-cleaning function	Yes
Reverse (REV)	Yes
Glass dispenser	Yes
Suitable for all types of berries	Yes
Suitable for all types of fruits	Yes
Suitable for all types of vegetables	Yes
Levels of safety	2
Height, mm	435
Width, mm	190
Length, mm	195
Weight, kg	6,45
Power consumption, W	200

## COLD PRESS Technology

### VERSATILITY

You can extract juice from almost any product

Our unique technology allows extracting juice not only from soft and juicy fruit and vegetables, but also from high-fiber vegetables, as well as from fruit and berries with seeds. You can extract juice even from greens and wheat germ!

### MORE JUICE

Increased amount of extracted juice

A durable screw mechanism is used for extraction. It presses and squeezes juice from fruit and vegetables, and, as result, more juice is extracted. The cake is drier due to the three-tier mesh filter, which thoroughly crushes and grinds the pulp.

### MORE VITAMINS

Natural, flavorful and tasty juice, full of vitamins

Cold press is the best way to obtain natural juice and preserve all the nutritional value (saves up to 68% of vitamins), natural flavor and taste of fruit and vegetables. Juicing process is quick and pleasant, and the resulting juice will be healthy, natural and charged with vitamins.
