## EK1775MD

## FULL PALLETE OF FLAVORS

As experts say, some teas should not be brewed with boiling water. For example, green tea should be brewed at a temperature of 70-80°C, oolong teas should be brewed at 80-90°C, water for coffee (espresso) should not be above 90°C. The Oursson electric kettle EK1775MD copes with these tasks due to three working modes. Select the desired mode with a simple button click. This kettle not only boils water, but also heats it up to a desired temperature. Besides, it maintains the required water temperature for two hours.

### Color

Green apple  
Dark Cherry  
Orange  
Red  
Ivory

### EAN-code

7640152891304  
7640152891328  
7640152891311  
7640152891335

### Main Features

Temperature adjustment from 60 up to 100°C  
Maintains water temperature for two hours  
Anti-scale filter  
Water level indicator  
Protection from switch-on without water

Electric kettle

## EK1775MD

Specifications	EK1775MD
Digital control	Yes
Temperature adjustment from 60 up to 100°C	Yes
Maintains water temperature for two hours	Yes
Fast boiling up to 100°C	Yes
Protection from switch-on without water	Yes
Automatic power-off	Yes
Concealed heating element	Yes
Anti-scale filter	Yes
Cordless body	Yes
Water level indicator	Yes
Cord storage	Yes
Sound signal	Yes
Capacity, L	1,7
Rated voltage	220V; 50 Hz
Level of protection	I
Power consumption, W	2400
