Mi5040PSD

bon appétit

SMART
technology

19

automatic
programs

The multicooker Mi5040PSD is a new and unique product on Oursson multicookers line. Due to voice navigation it can advise you how to choose easily and fast the required cooking program, or to set it up and will work standalone. Listen to its advices and choose one of the 19 programs – it will allow you to cook even the most difficult dish. Due to the inductive heating element, the dish will be prepared in short time, and the Smart Sensor technology will configure the correct cooking time depending on the inserted products volume. These are just few of this model's properties. It can wonder even the most capricious chef.
